SUMMARY

Motivated **Trainee Java Developer** with hands-on experience in **Core Java (Java 11, 17)**, **Spring Framework (Spring Boot, MVC, REST, Security)**, and **MySQL**. Strong understanding of **object-oriented programming**, **Java concurrency**, and **RESTful API development**. Familiar with **microservices concepts**, **Hibernate/JDBC persistence**, and full **Software Development Life Cycle (SDLC)**. Adaptable, analytical, and eager to learn new technologies while delivering clean, maintainable code.

WORK EXPERIENCE

Solveforge Private Limited

Web Developer Intern

July 2023 - August 2023

- Developed and maintained web modules using PHP, JavaScript, HTML, CSS, and MySQL
- Built REST APIs enabling smooth data flow between UI and backend components
- Collaborated with UI/UX team to enhance mobile responsiveness
- Used Git & GitHub for version control and deployment

EDUCATION

IMS Engineering College

Bachelor of Technology (Computer Science)

November 2020 - June 2024

Marigold Public School

12th

April 2019 - March 2020

St. Mary's Convent School

10th

April 2017 - March 2018

PROJECTS

Student Information Management System

- Developed RESTful services using **Spring Boot** for managing student records
- Implemented **secure CRUD operations** with proper validation and exception handling
- Integrated **Hibernate/JDBC** for database persistence
- Applied layered architecture and wrote clean, maintainable code

Prescripto Website [🔗](#)

- Developed backend APIs for doctor appointment booking and user interactions
- Integrated REST APIs to ensure real-time data flow between frontend and backend
- Improved overall system usability and performance

E-Commerce Food Ordering System

- Implemented backend logic for cart management, ordering, and menu handling
- Supported database operations and API-driven workflows
- Enhanced application flow and user experience

SKILLS

- **Languages:** Java (11, 17), SQL, JavaScript, HTML5, CSS3
- **Backend Frameworks:** Spring Core, Spring Boot, Spring MVC, Spring Security, REST APIs, Hibernate
- **Java Concepts:** OOP, Collections, Multithreading, ExecutorService, Callable, Future
- **Database:** MySQL (CRUD operations)
- **Architecture:** Microservices concepts
- **Tools:** Git, GitHub, Maven, Eclipse, IntelliJ IDEA, VS Code
- **Core Concepts:** SDLC, Problem Solving, API Development

CERTIFICATE

Java Full Stack Developer [🔗](#)

- Trained in **Java, Spring Boot, REST APIs, Hibernate, MySQL**
- Built end-to-end applications following industry best practices
